Idea Book

How does DNase-FLASH couple to nucleosome architecture?

1. Idea Filter - By Topic
2. Idea Filter - By People
3. Idea Filter - By Priority
4. Search Idea
5. Write New Idea
6. Record New Idea
7. Take Picture/Upload Image
8. Personal Account

Idea book is where lab members keep track of and share their ideas. The format of ideas can be images texts, sketches, audio records or videos. Ideas are color coded based on their status. Newer ideas have larger sizes and appears on top of the screen

What we're learning / tracking:
● Ideas

In order to:
● Encourage people generate more ideas
● Enforce collaboration

FIRST STEP

The first step includes the following:
● Creating an idea board in Trello accessible for all lab members
● Encourage people to post ideas frequently

NEAR FUTURE

The near future includes the following:
● An idea platform specific for Altius, integrated with lab notebook and storyboard.

DISTANT FUTURE

The distant future includes the followin
● Idea book connected with "smart objects" to capture ideas
● An interactive idea wall in the lab

Idea Book

1. **Comment**
2. **Voice Message**
3. **Add Attachment**
4. **Add Tag**
5. **Take Idea / Add to Notebook**
6. **Assign Idea (John)**
7. **View Activity**

The idea detail page is where lab members add content to idea. They can view detail of the idea, add related materials or leave voice message. They can also take the idea and add to their lab notebook. John has the access to assign idea to other lab members.
